Subject: Fw: recommended parameters for well water testing

Vicky, Jon has been providing assistance to the Marcellus Round Table discussions. One thing we comment on was the parameters they were recommending for testing should be reviewed. We volunteered to send them a list of parameters for sampling GW(private wells). We have the parameters used in Dimick, a list provided from several organizations provided below and the parameters ORD is using. Can you provide us with what parameters are important to do a baseline for private drinking water wells to assess if Fracking is of concern.

Subject: recommended parameters for well water testing

Page 3 of this Penn State Extension document provides a side-by-side comparison of recommendations from three state agencies and two academic ones.
